Entry of Amendment

Applicant's amendment filed on Sep. 8, 2005 is acknowledged. Claims 28, 34, 36 and 45 have been canceled and claims 46-48 have been added by the applicant, thus claims 1-27, 29-33, 35, 37-44 and 46-48 are currently pending. The allowability of claim 18 is withdrawn as detailed below.

Prior Rejections or Objections

The following comments pertain to the rejections or objections in the most recent Office action mailed on June 23, 2005. Rejections under 35 U.S.C. 102 and 103 are withdrawn, however, new grounds of rejection are presented below.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 18-26 and 46-48 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The preamble of claims 18 and 46 recite the method of transferring heat from a body portion, but one of the steps is supplying heat to a portion of the body. Clarification is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 18, 26 and 46-48 are rejected under 35 U.S.C. 102(e) as being anticipated by Kushnir et al. (6,685,731).

As to claims 18 and 46-47, Kushnir et al. disclose a method of transferring heat to or from a body portion comprising the acts of:

determining the state of vasoconstriction in a portion of a body;
supplying heat to that body portion, adjusting its temperature; and
controlling the vasoconstriction (col. 10, line 29-col. 11, line 25).

Further to claim 48, Kushnir et al. disclose the act of determining vasoconstriction or vasodilation, wherein the act of determining vasoconstriction or vasodilation includes sensing a characteristic of the body associated with the state of vasoconstriction or vasodilation by measuring blood flow with echo or ultrasound Doppler (col. 5, lines 5-11).

Allowable Subject Matter

Claims 1-17, 27, 29-33, 35, 37-44 are allowed.

Art Unit: 3739

Claims 19-25 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Knowlton (US 2003/0236487) discloses a method for treatment of tissue with feedback wherein when vasodilation and vasoconstriction are determined states.
